

# Eastview Christian Church

Bloomington, IL

## New Construction Multimedia Church Facility

*Music, drama, visual arts, technical ministries, and special events are all a part of this dynamic ministry.*

Eastview Christian Church performs two worship services to accommodate 3,500 members. It also has auditorium seating for 1600 members. A state-of-the-art electronics system was installed to meet the needs of this cutting edge ministry. The sanctuary/auditorium has two 12 ft X 16 ft video projection screens located on each side of the room. The screens provide easy viewing of song verses and close-ups of the stage. The sanctuary required three main speaker clusters to evenly distribute sound throughout the room. Eastview has a creative arts technical staff to meet all the needs of fine tuning the equipment. Initial training for equipment installed was provided by TEC to the church's technical specialists.

*Main  
rack  
system*

## Contractor Engineering & Installation

- Engineering suspension of all speaker clusters
- Conduit system layout
- Electrical power distribution
- Preliminary balancing and tuning of the systems installed
